INFORMATION SHEET

OCTOBER 2021

GENERAL SECRETARYS REPORT

FUTURE OF THE PERMIT ISSUE

We are still investigating the possibilities of changing over to a “virtual” permit that can be stored on a members smart phone thus avoiding paper permits. One company has told us that they cannot get a system in place ready for next season but enquiries are still ongoing with another company.

GREEN PARK RAILWAY STATION

I understand that the station build from our side of the track will be completed sometime around Christmas and we will then be considering it's future use.

SONNING EYE

Following the report on the last Information Sheet the Sailing Club have commenced work on the track and seem to have come to a resounding halt with about half of the works “finished?”. I am waiting for a call from them.

FISHERIES OFFICER REPORT

FARNHAM FLINT

We recently held a full day seminar with the local police to introduce them to the laws concerning fishing. This appeared to go down really well and was enjoyed by all. Willmotts and Callows are fishing really well with the crucians making appearances on Callows.

ENGLEFIELD TRACK

The footpath track around this venue has been completed including the piece linking Callows Pool to Englefield Lagoon.

PINGEWOOD LAGOON

Whilst our Fisheries Officer was away on holiday his deputy Jamie has given this venue a massive clean up including cutting back vegetation and strimming. You can now walk all around the venue.
